

FLORENCE CRITTENDON DRIVE FOR MEMBERSHIP

A membership drive for the Florence Crittendon home mission of Arizona, a rescue home for girls, is on. This work, which is so well known as to need no introduction, is one of the most effective social service movements known. The membership fee is one dollar per year.

There are 73 of these homes in the United States and five in foreign countries, and during the year 1919 over 23,000 girls were cared for by this mission.

The drive will continue the entire month of October and it is to be hoped that the people of Arizona will come to the front in helping this worthy cause.

BRINGS IN NUGGETS FROM COLORADO RIVER

Sandy Harris was in this week from his placers on the Colorado river, bringing with him an unusually large amount of nuggets. Sandy has some of the claims opened up pretty thoroughly now and will move the machinery to other claims to open them up.

MUCH INTEREST IN U. E. SHAFT NO. 3

(Continued From Page 1)

sume shaft sinking and bases its action upon the work being done by the United Eastern.

Late advices state that the United Eastern shaft has a depth of about 775 feet. An increase in the water-flow is noticeable, and old time mining men here state that the condition indicates a ledge is located thereby. Early in November should see Number Three shaft at the 800-foot point. A station will be cut at that depth, and the shaft be then continued on to a depth of 1,000 feet.

At the Oatman United property, a series of diamond drill holes are being driven to determine the width and quality of the ore opened in the drift on the 600-foot level. This vein is entirely new; that is to say, it is off the main ore-bearing vein system of the Tom Reed and United Eastern. It has carried excellent average values for a length of over 200 feet. The work done of late with the drills demonstrates that the drift on the 600-foot level is in the apex of the ore body only, and that depth is all that is required to open an ore shoot of breadth. The values are already in the ore where it is opened on the 600-foot level, hence it is vein breadth and not vein values which are necessary.

Plans are now being made to resume development work at the property of the Oatman Gold Mining Company, adjoining the Oatman United estate on the east. The strike of the rich Oatman United ore body is across the property of the Oatman Gold Company, and the plan now is to start a new shaft several hundred feet south of the old shaft, with a view to opening the vein continuation at depth. It is generally believed here that the Oatman Gold will prove as valuable a mining proposition as its neighbor, the Oatman United.

The Tom Reed Company is gradually developing the ore body in the Aztec section of the estate, and is tramming a constant stream of ore from this work to the company mill at the old Ben Harrison shaft. The shoot in Aztec territory is said to be one of the best ever opened by the Tom Reed management. Conditions in the Aztec ground, together with the great future possibilities held by its Red Cloud acreage, marks the Tom Reed as one of the premier gold mines of America; and this, despite the fact that some months ago it was intimated that the peak of its ore production was past.

RIVER RANGE IN PROVEN GOLD AREA

(Continued From Page One)

The ore body has been partially developed to a depth of 60 feet by means of a winze sunk thirty feet below the floor of the big stope or chamber from which the tonnage already referred to was removed. In the bottom of the winze the ore is said to be richer than on the level above.

The ore blocked out at several points along the course of the vein, at one point at least a thousand feet distant from the immense ore chamber, has a value of from \$8 to \$10 gold a ton across a breadth of from 15 to 40 feet. It is estimated that much of this ore can be glory-holed at a very nominal cost, and that all of it can be mined and milled at a cost not to exceed \$6 a ton. This would mean that all of the ore blocked out has a net value of from two to four dollars a ton and that the ore yet to be developed would probably net equally as well. At surface the vein can be traced a length of fifteen hundred feet and has a breadth of from 15 to 40 feet.

It is reported that the Klondike mine is soon to be worked on a scale in keeping with its splendid ore showing. The start of mining work there would serve to encourage the resumption of activity in the properties in that section, with the result that another gold camp of merit would be added to those already established in the River Range.

MINER WANT ADDS. BRING RESULTS

TWO WHISKEY MAKING OUTFITS TAKEN HERE

Deputy Jim Shaw recently captured a 25-gallon still and 500 gallons of mash in the mountains about 18 miles east of Yucca. The still was unattended. The officers are investigating the case and believe that they have the right man under surveillance. Two hundred and twenty-five pounds of dried peaches and 400 pounds of sugar were used in making the mash.

Deputy C. A. Imus took a part of a whiskey making outfit and some whiskey on Walnut Creek. The man whom it is thought operated this still is also under surveillance.

COFFEE HOUSE TO OPEN

SATURDAY NIGHT

George Claytor plans to open his coffee specialty store tomorrow night. The little building on Beale street has been worked over and the front changed to give it a nice appearance. Mr. Claytor will roast his own coffee and specialize in different blends. He was in this same business in Pasadena before coming to Kingman.

OLD HOTEL BURNS

It will be of interest to some of our readers who have visited Washington, D. C., especially in the early days, that the old National Hotel there, which has stood for a hundred years, was burned on the 2nd of this month. This news was sent Major Mensch this week by Edward W. Schmid, past Grand Monarch of the Blue Lodge, who lives in Washington.

CASHIER OF NEEDLES BANK IS DEAD

W. C. Kaiser, cashier of Monaghan-Murphy Bank, died last week in Los Angeles. Mr. Kaiser was one of the best men Needles ever had and his death will be a distinct loss to that town. He had been in ill health for some time, but his death was not expected. He had been with the bank for a number of years and had established himself in the love and esteem of the community.

SIXTEEN-YEAR-OLD DRIVES PICK IN HEAD

(Continued From Page 1)

Tor Taylor was brought to town, where his wounds were dressed and in 20 minutes from that time, Officers Imus and Harris were on the scene and after the culprit. They worked through the country until nearly one o'clock without being able to locate him. They then came back to town and after further questioning the Champagne boy, who had been locked up in the county jail, Deputy Harris left for Ash Fork on the theory that Long would catch a freight going east. When morning came Deputy Sheriff Imus put four Indian trailers on the boy's tracks. They trailed him around through the hills and back down to the railroad track, strengthening the theory that he had boarded a freight.

Sunday night between sundown and dusk Harris, who had posted himself a little this side of the yards at Ash Fork, saw a boy get off of a freight train, a mile down the track. It had been the intention of Long to cut out Ash Fork entirely and cut across to the Peavine and board a freight for Phoenix. Harris had outguessed him at his game and was down where he thought he would get off the train. Harris kept himself under cover until the boy was within a couple of hundred yards of him, and then started walking slowly in the same direction Long was going, so as to not scare him away. Pretty soon Long caught up with Harris. He asked his name. Long replied, "Jim Smith." Harris then said, "No, that isn't your name. You're too nice a looking kid to have a name like that," and snapped the bracelets on him. He took him to the Ash Fork jail and then told him that he had better tell him the truth because that jail burned two or three times a week and it wasn't safe. The jail is a nice little fireproof affair, but Long didn't think of that and so came through with the truth and told him that he had tried to kill the doctor to get his car. He was brought back here Tuesday morning. The whole job was well handled by the officers. With the adds against them they landed their man twenty-four hours after the attempted murder. The odds were against them because a man who is riding a freight train has all the best of it.

Inasmuch as Long is under age his case will have to be tried in Judge Bollinger's court and it is understood that the judge has the right to call a jury and have a juvenile tried on a felony. The judge will determine this phase of the question upon his return from a hunting trip and Long's case will come up in the near future.

Long's age was determined through investigation at Fort Grant, from which institution he was on parole. He was sent to Fort Grant for stabbing another boy. Long admits he is a "bad man" and that he has an "awful temper." He referred the officers to his record in Phoenix if they did not believe this. It is evident that Long is short several good spankings that he deserved a few years back. But this last crime puts the case beyond the spanking phase and develops into an attempted cold blooded murder.

Dr. Taylor, who is a Brownwood, Texas, man, so far has not suffered any bad effects from his wounds and will go on to his home as soon as he has served as a witness here.

FIRST MEETING OF THE THURSDAY AFTERNOON CLUB

The first meeting included a reception to the members. A piano solo was rendered by Mrs. R. L. Anderson and Miss Peggy Parsons and Miss Thelma Clark sang in their usual pleasing manner.

Refreshments were served at the close of the program in Social Hall. The ladies having charge of the meeting were Mrs. H. T. Smith, Mrs. W. P. De Wolf, Mrs. J. A. Ware and Miss Marion Binford.

The Thursday Afternoon Club beckons to any woman aspiring to work for the welfare of this community. If there are many more who wish to join the club will you kindly telephone your request to Mrs. John Allen Ware. We wish to have all the names of the new members in the Year Book, so please be prompt.

PEARLE S. WARREN,
President.

The Thursday Afternoon Club held its initial meeting of the year at the M. E. church parlors Thursday, the 6th. The officers for the ensuing year are: President, Mrs. C. A. Warren, first vice-president, Mrs. H. T. Smith; second vice-president, Mrs. W. C. Todd; recording secretary, Mrs. M. B. Dudley; corresponding secretary, Mrs. J. A. Ware; treasurer, Mrs. C. J. Wallis.

The chairmen for the departments are: Mrs. M. B. Dudley, for the Civics; Mrs. W. C. Todd, the Literature and Music; Mrs. S. T. Elliott, the Home Economics.

RUNYON LEAVES ON MIDDLE WEST TRIP

A. L. Runyan, who is now interested in the Old Dad and the Hibernia mines in Mohave County, used to ride the bad ones in a Wild West show, the "101 Bison" outfit. Just before leaving for the Middle West, though, he connected up with a nice looking pony at the Fancher ranch that was too much for him. This animal used its brains and making for a mesquite bush, scraped our friend Runyan off. Whereupon Runyan took the mustang out in the open and rode him until he took these notions out of his head. Mr. Runyan recently took over the Old Hibernia and started operations at once. He left for the Middle West Saturday night and will be gone about three months. Work will continue on the Old Dad mine while he is gone.

WORK IN KATHERINE SECTION GOING GOOD

(Continued From Page 1)

Cameron sinker pump went into commission this week on the 400-foot level in the Katherine workings as a means of expediting the sinking of the winze located near the face of the east drift at that depth. A 50-ton ore pocket has also been erected near the collar of the winze. As the winze is deepened the gold values are holding strong at the returns received at a depth of 22 feet therein. Grab samples of the ore at the 22-foot point gave gold returns of from \$16.40 to \$320 a ton. These returns are considered indicative of the value of the ore that will be opened by means of the winze in the area between the 400-foot level and the proposed 700-foot level. With a large tonnage of high grade and milling grade ore opened at and above a depth of 400 feet, the conditions are now strongly favorable for the development of a tonnage below that point which will add appreciably to the \$3,000,000 valuation at present placed on the mine.

At the Revenue property a 25-horsepower hoist and a powerful compressor plant went into commission the current week. Shaft sinking has been resumed at a depth of 60 feet and will continue until a depth of 400 feet is gained. There a crosscut will be driven to the continuation of the big Gold Chain vein, one of the strongest and best mineralized in the Katherine district. Other surface improvements recently made at the Revenue include the erection of buildings for the accommodation of employees. Development work is in charge of Henry Johnson, who has mined successfully in Mexico and elsewhere.

Late reports from the Adams property state that the quartz replacement of calcite in the big vein continues to increase as depth is gained, and that at a depth of 75 feet grab samples of the ore give a very high gold return. At the Comstock Consolidated property, located to the east of the Adams, plans are being made to develop the continuation of the Gold Chain vein at depth. The Comstock Consolidated adjoins the Gold Chain mine and the east strike of the rich Gold Chain vein carries it through the center of the Comstock group. The property has been financed in Los Angeles through the agency of Senator James Curtin, one of the principal owners.

The Nevada-Katherine property, located in the Tristate, Nevada, section of the Katherine district, has also been financed in Los Angeles. Prospecting of the vein outcrop is now being done for the purpose of selecting the site for a double-compartment shaft. The surface work to date has resulted in the discovery of free gold quartz for a length of 200 feet along the southwest continuation of the Katherine vein. On the tunnel level the vein assays as high as \$1471 gold a ton. Machinery is to be installed this month and the vein opened at depth by three shifts of miners.

Heavy trading again featured all mining issues. With the exception of one or two all remain firm at last week's close. Adams declined one point, probably due to the fact that the assessment date is near at hand. Tom Reed dropped back five points as did United Eastern, the latter on account of the 15% dividend payable October 28. Nevada Katherine and Katherine Extension remained firm at the new high level they made last week. Bonds are steadily advancing in price and are very heavy traders.

DANCE TO BE GIVEN BY WOMENS AUXILIARY OCT. 15

A dance will be given by the Woman's Auxiliary of the American Legion Saturday evening, October 15, instead of the 22nd, as previously announced. The committee reports there will be several additional features for the evening's entertainment and that a splendid jazz orchestra has been secured to provide the dancers with music.

Lemonade will be served and the regular admission price of one dollar will be charged.

DRIVING TUNNEL ON GOLD ROCK GROUP

Frank J. Harner, who represents W. W. Lawton in this district, was in town yesterday and reported that he was doing title work on the Gold Rock Group, about 15 feet of tunnel having been negotiated the past few days. This tunnel will be worked to a depth of about 50 feet with the idea of prospecting the ore body on the claims.

There are four claims in the Gold Rock Group and they are located about 1 1/2 miles north of the Gold Trail property.

HERE FOR EXAMINATION OATMAN GOLD M. & M. CO.

W. F. Boericke, engineer representing Chicago clients, is here for an examination of the property of the Oatman Gold Mining and Milling Company, at Oatman. While here Mr. Boericke will look over the entire district, however, as well as completing his examination.

Mr. Boericke is a graduate of the Colorado School of Mines and a member of the American Institute of Mining Engineers.

DISPLAYS VEGETABLES GROWN IN KINGMAN

Major Mensch this week placed on display in the Central Commercial Company some of the vegetables and flowers grown in his garden in the Metcalfe Addition. The display included yellow and red Ponderosa tomatoes, a Persian sian melon and some chilis and some dahlias. The Major has been very successful with his garden. He plans to have tomatoes all winter by enclosing his plants with burlap.

MINER WANT ADDS. BRING RESULTS

CELEBRATION PLANNED FOR ARMISTICE DAY

The American Legion and Women's Auxiliary are to have a celebration Armistice Day which will surpass anything yet attempted by the local veterans.

There will be sports and military features. The Legion will have a special meeting Saturday evening at 7 o'clock and all ex-service men who are not members are invited to attend and help put it over as they did three years ago.

It will be remembered that this day has been selected by President Harding as the day that one unidentified soldier shall be buried in the Arlington National Cemetery.

As we cannot pay our respects in person to this loyal buddy that gave all he had to give, we can and will pay our respects here at home to him and all the loyal boys who made the supreme sacrifice overthere for us.

"STAG PARTY" LAST WEDNESDAY NIGHT

Wednesday night of this week Arthur H. Hawkins was host at one of the most enjoyable stag parties that have been held here for some time. A sumptuous dinner of Chinese dishes, topped off with an immense fruit cake was served early in the evening after which the score or more business and mining men of Kingman started the usual round of stories and jokes while they smoked. Several of the old timers of early day mining in Colorado and Nevada were there and they had sort of a re-union.

T. J. MURPHY VISITOR HERE

Jim West, Needles constable, was telegraphed Tuesday to try and locate a couple of pictures of Tristate, taken from Ed Shaw's office in the Beale. The description of the man suspected was a "slender man weighing over 200 pounds." Of course it was a joke, and this was Ed's way of getting even with our friend Tom Murphy, who had liked the pictures and had appropriated them, leaving a note, "Thanks for leaving these pictures here for me, T. J. M." Mr. Murphy was up here this week on a short business trip.

MACHINERY SOLD BY LOCAL FIRM

Tarr, McComb and Ware Commercial Company report the sale of two large pieces of machinery to the Katherine Gold Mines Company. One is a 200 H. P. Chicago Pneumatic Giant oil engine, weighing 64,000 lbs. The other is a 1145 cu. ft. Chicago pneumatic 2 stage compressor, equipped with simplex valves and controlled by differential unloaders. This machinery is now rolling and will be installed by men from the factory not later than December 1.

READ THE MOHAVE MINER FOR MINING NEWS

S. F. CHRONICLE MAN WANTS NEWS ON DISTRICT

W. F. Hume of the San Francisco Chronicle, who is getting out a 16-page supplement on this district for that paper, says his work is progressing nicely. Mr. Hume was working his property, the Gold Silver Group, in the Chimeuvavis Mountains, when the Chronicle took this work up with him.

Mr. Hume is not calling on this community for financial support for the edition, as he will get the expense money largely from San Francisco brokers, according to his plan. He does ask, though, that anyone having news matter to put in the edition call on him at the Brunswick Hotel, Kingman, or write him there.
